CS 4680 · AI PRODUCT DEMO

AI Smart TODO List

From a static task list to an intelligent productivity coach.

Plan better. Prioritize faster. Act with confidence.

Overwhelm hides the next step.

Traditional TODO lists

They store tasks, but they do not explain what to do first or how to break down complex work.

Our solution

The AI understands the current task list, recommends priorities, and can create or update TODOs through conversation.

See it work in real time.

LIVE DEMO

Watch the AI organize, split, and prioritize tasks.

Designed for useful answers.

01

Persona prompt

Defines the AI as an expert, encouraging productivity coach so responses stay focused and actionable.

02

Few-shot examples

Shows examples of empathetic task breakdowns and the expected response style for more consistent results.

CONTEXT: THE MODEL ALSO RECEIVES THE CURRENT TODO LIST

A more accessible way to plan.

Impact today

Users can turn an overwhelming list into a clear, prioritized plan with natural language.

Potential next steps

- Calendar integration and automatic scheduling
- Voice input and reminders
- Personalized productivity insights
